Subject: [External] Dominion solar proposal

This is to register a strong objection to the current net metering proposal from Dominion Energy, docket #2020-229-E.

I get my electricity from Duke Energy, not Dominion, but have leased solar panels. If a similar tariff was applied to my account, it would result in a doubling of my annual electricity bill - catastrophic for a person on a fixed income. If Dominion is successful it won't be long before Duke follows suit. Please don't do this to the citizens of SC.

Additionally, as a matter of public policy, we need to be on the right side of history here. Across the country individuals, organizations and corporations are increasing their reliance on renewable energy, realizing that continued reliance on fossil fuels is unsustainable.

Don't punish those of us who are trying to do the right thing by reducing carbon emissions for the future of our planet and our children in mind.

Respectfully,

Mary Steffes

Clemson, SC
